Rough rice acreage, yield per acre, and production in specified countries .....	38-39

October 1967

## RICE - ANNUAL MARKET SUMMARY

### HIGHLIGHTS OF 1966-67 SEASON

Milled rice prices fluctuated within a relatively narrow range during the 1966-67 marketing season. The general level of prices, however, averaged a little higher than the year before. Rough rice supplies for 1966-67 stood at an all-time high, reflecting the record production of rice. Total disappearance of milled rice reached a new high behind record-breaking exports and continued heavy brewery and domestic food usage. The 1966 rice crop generally turned out higher head rice milling yields. Farmers put much more rice under price-support loans, but most of it was redeemed before the end of the season. U. S. milled rice exports during 1966-67 hit an all-time high of nearly 38 million cwt. -- more than half of which were commercial "dollar" sales. Shipments to Asia showed a sharp gain, while exports to African countries dropped off.

### PRICES

Milled rice prices showed a mixed trend in the South during the 1966-67 marketing season. Except for the usual early-season downward adjustment to a new-crop basis, Bluebonnet prices held relatively steady most of the season in Arkansas, Louisiana, and Texas. Belle Patna followed a steadily rising trend in Louisiana as supplies gradually diminished. However, Belle Patna prices fluctuated from month to month throughout the season in Texas where supplies were more plentiful and the market was more sensitive to changes in demand. Medium-grain prices displayed a firmer tendency in Arkansas and Louisiana, but varied a good part of the season in Texas. Month-to-month variations in Texas were not as marked for medium grain varieties, though, as they were for Belle Patna.

Despite the unusual differences in price trends of the major varieties, the general level of milled rice prices in the South during 1966-67 was higher than the previous season. Medium-grain prices ran 15-25¢ per cwt. above the preceding year during the first four to five months of the season, and then held at about the same level as the year before for the balance of the season. Bluebonnet also was a little higher during the early part of the year, but it ranged 5-25¢ lower for the last half of the season in Louisiana and Texas. On the other hand, Bluebonnet prices in Arkansas were on a par with the previous year during the last half of the season. Belle Patna prices started out the season considerably higher than the year before in Texas but were not much different the rest of the year.

California milled rice prices held steady throughout the 1966-67 season. Even so, the general level of prices for both Pearl and Calrose during the first four months of the season ran about 25¢ per cwt. higher than the same period a year earlier. Prices were on a par with the previous season the rest of the year.

Prices of both long and short-grain second heads generally held steady and at or near the same level as the previous season in the South and California.

Brewers' rice averaged about 5¢ per cwt. under the year before in the South. Prices ruled firm all year in California where brewers' rice was in tight supply. Prices of rice screenings fluctuated moderately throughout the season in the South but the general level of trading ran a little above the preceding year. Rice by-products -- bran and millfeed -- followed an uneven course, paralleling trends in the feedstuff market. Bran and millfeed started out the season about \$3.00 per ton above the year before. Demand held up well during the fall and winter months, and prices climbed steadily through January. The trend turned downward during the spring and summer months as pasturage became available and demand slacked off. At the end of the season, prices ranged \$5.00-10.00 higher than the previous season's close in the South but \$4.00 lower in California.

#### SUPPLY AND DISTRIBUTION

##### Rough Rice

Rough rice supplies available in the United States for the 1966-67 season totaled a record-breaking 90.5 million cwt. This ran nearly 9.4 million cwt. more than the preceding season's former record. Carry-over stocks of rough rice at the beginning of the season were up 575,000 cwt. from the previous season. Production hit a record 85 million cwt. -- almost 9 million cwt. greater than the prior all-time high set the year before.

Disappearance of rough rice during 1966-67 soared to a record 84.4 million cwt., or 8.6 million cwt. more than the previous season. Most of this went, as usual, for milling. Seed usage and exports showed little change.

On the basis of conditions October 1, 1967, rough rice supplies for the 1967-68 season were estimated at 96.8 million cwt. -- a new all-time high. Again, it was due largely to the record production which was forecast at 90.6 million cwt. in 1967, or 5.5 million cwt. more than in 1966. Carry-over stocks went up by some 700,000 cwt.

##### Milled Rice

Supplies of U. S. milled rice in 1966-67 hit a new high of 60.4 million cwt. This was 7 million cwt., or about 14 percent, above the previous year's former record. Most of the increase in supplies resulted from the record production of 58.4 million cwt. of milled rice -- 7.4 million more than the old record set the year before. Carry-over stocks were down a little, while imports dropped sharply and were insignificant.

Disappearance of milled rice soared to an all-time high of 58.7 million cwt., or 7.3 million cwt. more than the former high set the previous season. Much of the increase was attributed to the sharp rise in exports which totaled a record 37.7 million cwt. Shipments to the territories and usage by breweries increased moderately and were at the highest levels in five years. The quantity of milled rice available for domestic food usage stood at 13.4 million cwt. -- about on a par with the relatively high level of the preceding three years. Stocks of milled rice on hand at the end of the 1966-67 season amounted to just under 1.7 million cwt. -- about 300,000 cwt. less than the year before and the smallest in four years.

Stocks of all rice on August 1, 1967, totaled 8.5 million cwt. (rough rice basis) -- up slightly from a year earlier. Stocks were smaller in the South and larger in California, but a substantial part of the California stocks was committed for export.

#### MILLING YIELDS

##### Southern

Head rice milling yields of the three major varieties of rice produced in the South during 1966 averaged a little higher than those of the previous crop. The outturn of total rice increased, too. <sup>1/</sup>

Nato showed the most improvement in head rice milling yields. This variety yielded 4.5 pounds more head rice than the previous crop in Mississippi and 2.9 pounds more in Arkansas. In states where most of the Nato is produced, its head rice yield was only two-tenths of a pound higher in Louisiana, while it ran three-tenths lower in Texas. Belle Patna yielded 3.9 pounds more head rice in Arkansas, 1.2 pounds more in Louisiana, and two-tenths of a pound more in Texas. Head rice outturns for Bluebonnet were mixed -- up 3 pounds in Mississippi and 1.5 pounds in Louisiana but down 1.9 pounds in Texas and three-tenths of a pound in Arkansas. The head rice yield of Saturn (produced mainly in Louisiana) was down 2.3 pounds on an average.

Nato generally showed the best overall head and total rice milling yields, but the percentage of this variety grading U. S. No. 1 was smaller than that for Bluebonnet and Belle Patna. Bluebonnet and Belle Patna had similar head rice yields, but Bluebonnet showed a better total milling yield. Bluebonnet also had an edge over Belle Patna on the percentage grading U. S. No. 1. (See details in tables on pages 23-26.)

##### California

On the basis of inspection data, Pearl yielded 53.1 pounds of head rice and 68.4 pounds of total rice for each 100 pounds of rough rice milled in California during the 1966-67 season. This compared with 56.5 pounds of head rice and 68.1 pounds of total rice per 100 pounds of rough rice milled the year before. Calrose turned out 55.1 pounds of head rice and 68.7 pounds of total rice compared with 54.8 and 67.4 pounds, respectively, in 1965-66. Outturn of head rice, brown rice, second heads, screenings, and brewers' rice, based on millers' reports, are shown in the tables on pages 25 and 26.

#### CCC ACTIVITIES

##### 1966 Crop

Farmers put nearly 14.4 million cwt. of 1966-crop rice under price-support loans. This was about 4.6 million cwt., or 47 percent, more than they put under

<sup>1/</sup> Milling yields are expressed in the number of pounds of head rice and the total pounds of milled rice obtained from 100 pounds of rough rice. Data are based on reports of the Rice Inspection Service.

loan from the 1965 crop. Two states accounted for most of the rice put under loan -- 59 percent of the total in Arkansas and 24 percent in Texas.

Very little of the rice put under loan was ultimately delivered to the Commodity Credit Corporation. Deliveries totaled 117,000 cwt. -- 87,000 in Arkansas, 12,000 in Mississippi, and 18,000 in Texas. Three-fourths of this was Bluebonnet rice.

Sales of rough rice by CCC during fiscal year 1966-67 totaled around 465,500 cwt. -- sharply below the previous year's sales of 1.1 million cwt. Most of the rough rice was sold for milling to provide for school lunch and domestic relief programs. In addition, CCC also purchased some 279,000 cwt. of milled rice for school lunch, 660,000 cwt. for welfare, and nearly 81,000 cwt. for institutional programs.

CCC's inventory on August 1, 1967, amounted to 140,000 cwt. of rough rice. This was only about one-fourth as much as the year before. No milled rice was in the CCC inventory.

### 1967 Crop

A little more than 2 million acres was allotted to U. S. rice-producing states for planting the 1967 crop. This was the same as the final 1966 crop allotment and included a temporary 10 percent increase. A similar 10 percent increase also was applied to the 1966-crop acreage allotments. The acreage actually planted to rice in 1967 was estimated at just under 2 million acres and within the total allotment.

National average support price for 1967-crop rice is \$4.55 per cwt. -- up 5¢ from the preceding year. However, because of a larger proportion of higher-priced long-grain rice and higher yields of head rice, value factors are increased only 1¢ per cwt. by the 5-cent increase in the national average support. The price-support level for 1967-crop rice reflects 66.2 percent of the August 1967 rice parity price of \$6.87 per cwt.

The method of computing rough rice basic support rates is the same as that used in the 1966 rice support program. Value factors are used to determine support rates for the different varieties of rice. Basic support rates are applicable to the U. S. No. 2 rice. The schedule of premiums and discounts for grade are unchanged. Location differentials also are unchanged except for a 5-cents per cwt. decrease in Imperial County, California, and adjacent counties in California and Arizona. The addition of the variety Dawn to Group II long grains in 1967 is the only change in the varietal groupings.

### EXPORT ACTIVITIES

#### Rough Rice

The United States exported about 160,000 cwt. of rough rice (mostly seed rice) during the 1966-67 season. This was some 8,000 cwt. less than the year before, but still ran above the total for most other recent years.

Venezuela remained the largest foreign customer for U. S. rough rice, taking nearly three-fourths of the total quantity shipped abroad. One of the most notable changes in the pattern of rough rice exports from this country in recent years was the sharp drop in shipments to Mexico -- only 307 cwt. this season compared with slightly over 25,000 cwt. in 1965-66. Another significant change was the export of almost 16,000 cwt. to Italy -- the first rough rice exported to that country. Although imports were relatively small, Bolivia, El Salvador, Surinam, and Western Africa entered the market for U. S. rough rice for the first time in recent years. Ecuador also re-entered the market after not taking any U. S. rough rice during the previous season.

#### Milled and Brown Rice

Exports of milled and brown rice from the United States during 1966-67 hit a record-breaking 37.7 million cwt. This was 6.6 million cwt., or about 21 percent, more than the previous season's former record. Brown rice made up 12.6 percent of the total exports, and parboiled rice accounted for about 8.5 percent of the total.

Commercial exports, or "dollar sales," totaled 20.5 million cwt. -- a little under the previous year's record but well above other recent years. Government-financed sales increased sharply, amounting to a little more than 19 million cwt., or 9.4 million cwt. more than the preceding season. Eighty-five percent of the Government-financed sales were made for foreign currency. The balance were long-term dollar credit sales.

Exports of rice to Asian countries rose sharply during the 1966-67 season. Shipments to Europe showed a moderate gain, while takings by the Western Hemisphere and Oceania were only slightly larger than a year earlier. Africa, on the other hand, took much less rice than it did the preceding season.

Some 3.5 million cwt. were exported from the United States to Western Hemisphere countries. This was about 15.5 percent more than in 1965-66. Much of the increase was due to the very sharp rise in exports to Peru. That country took nearly 1.1 million cwt. of U. S. rice, or about 30 percent of total exports to the Western Hemisphere. Only about 279,000 cwt. were shipped to Peru the previous season. Shipments to Canada -- our largest regular customer -- ran a little larger than the year before and about on a par with the average of the past four years. About 70 percent of the rice shipped to Canada was brown rice. Shipments to Mexico dropped from nearly 423,000 cwt. in 1965-66 to less than 13,000 cwt. in 1966-67. Exports to other relatively large customers, such as Jamaica, Nicaragua, Chile, and Costa Rica, increased, while shipments to El Salvador and the Netherlands Antilles declined.

Exports of 5.4 million cwt. of rice to Europe during 1966-67 ran nearly 1.5 million cwt., or 37 percent, larger than the year before. Of the total, 2.1 million cwt. were brown rice. Takings by the United Kingdom rose sharply, totaling almost 1.4 million cwt. compared with some 877,000 cwt. the previous year. Rice exports to West Germany -- usually our largest European customer -- ran a close second at just under 1.3 million cwt., or a little more than the year before. Brown rice made up about two-thirds of the rice exported to West Germany and a third of that going to the United Kingdom. Shipments to Belgium,

France, and the Netherlands rose sharply. Poland re-entered the market after a year lay-off, while Portugal and Turkey dropped out of the market entirely. Exports to most other European countries showed little change from the previous season.

About 40 percent more rice was exported from the United States to Asian countries during 1966-67 than the year before. Asia took some 24 million cwt. -- 6.8 million cwt. more than the year before. Brown rice accounted for 1.7 million cwt. and parboiled rice 1.5 million cwt. of the total.

Most of the increase in 1966-67 exports to Asia was due to the huge rise in exports to South Viet-Nam -- 14.2 million cwt. compared with 7.3 million the preceding season. Some of these exports to Viet-Nam, however, came from old-crop California stocks. Exports to India showed the second largest gain, totaling nearly 1.4 million cwt. Shipments to the Philippines, Saudi Arabia, Hong Kong, and Indonesia went up moderately. These were more than offset, however, by a very sharp drop in exports to Japan -- 2.2 million cwt. in 1966-67 compared with 4.8 million cwt. the prior season. Exports to most Middle Eastern countries, except Kuwait and Lebanon, increased slightly. So did shipments to Malaysia, Pakistan, Korea, and Singapore.

Exports to Oceania, although up a little for the season, were not significantly different than the previous year. The British West Pacific Islands took, as usual, about half of the total U. S. rice exported to Oceania.

Exports of 4.4 million cwt. of rice to African countries during the 1966-67 season ran about a third smaller than the previous year. Parboiled rice comprised about 30 percent of the total.

The Republic of South Africa remained the largest African customer for U. S. rice even though its takings of about 1.4 million cwt. during 1966-67 were down slightly from the previous year. Exports of 1.1 million cwt. to Ghana ran a close second as usual and were a little above the year before. Shipments to Guinea, the Ivory Coast, and the Congo dropped sharply, while Senegal did not take any rice from the United States. Exports to Angola, Liberia, Sierra Leone, and Tanzania showed moderate declines. On the other hand, more rice was exported to Malawi, Mauritius, Rhodesia, the Somali Republic, Spanish Africa, and Western Africa than during the 1965-66 season.

1/ Year begins August 1 for Southern Area and United States and October 1 for California.

2/ Includes feed, waste, loss, shrinkage, etc.

3/ Does not total the sum of the Southern Area plus California as given above. California data adjusted to August 1 basis.

4/ Preliminary.

1/ Begins August 1 for Southern Area and United States and October 1 for California.

2/ Includes Government-owned stocks.

3/ Production of heads, second heads, screenings and brewers' rice.

4/ Imports and exports from Bureau of the Census.

5/ Does not total the sum of the Southern Area plus California but does include California data adjusted to an August 1 basis.

:					
U. S. average support rate .....	4.55	4.50	4.50	4.71	4.71
:					
Parity for price support 2/.....	6.87	6.70	6.62	6.33	6.46
:					
Support rate as percent of parity .....	66.2	67.0	68.0	74.4	72.9

1/ Basic 1967 support rates will be adjusted by the following premium or discount, per 100 pounds, for grade: U. S. Grade No. 1, premium of 10¢; No. 3, discount of 15¢; No. 4, discount of 30¢; and No. 5, discount of 50¢. No. 2 rice will receive the basic support rate. A further discount for location, to adjust for transportation costs of moving the rough rice to an area where competitive milling facilities are available, will be made for rice produced in the following areas at the indicated rates per cwt.: Florida, 96¢; North Carolina and South Carolina, 92¢; Imperial County, California, and adjacent counties in California and Arizona, 97¢; Holt, Lewis, Lincoln, Marion, Pike, and St. Charles Counties in Missouri, and Adams County in Illinois, 62¢; Lafayette, Little River, and Miller Counties in Arkansas, McCurtain County in Oklahoma, Bowie County in Texas, and Bossier Parish in Louisiana, 25.5¢.

2/ Generally mid-July parity price.

Agricultural Stabilization and Conservation Service.
